Work Experience

Java Backend Developer Company: Voiceloft Duration: 05/2024 - present

Developed REST APIs using Java with Spring Boot, deployed on Tomcat and Nginx. Built automated scrapers for YouTube, Facebook, Twitter, Telegram, Instagram, and TikTok, using AI for data extraction and speech-to-text conversion. Integrated a Telegram bot for real-time alerts. Worked on full stack projects with React.js (front-end) and Spring Boot (back-end), deployed on AWS for high availability and scalability.

Java Backend Development Instructor Company: Turing Academy Duration: 06/2024 - Present

Teach foundational Java SE concepts, including OOP principles, functional interfaces, generics, enums, and lambda expressions. Instruct students in algorithms, data structures, SQL, and networking, ensuring a solid understanding of backend development. Provide hands-on exercises and personalized support to help students master both theoretical and practical aspects of programming.

Java Backend Developer Company: TuringSec Duration: 02/2024 - 05/2024 (Remote)

Developed a payment processing system using Java with Spring Boot, Spring Security, and Liquibase. Built RESTful APIs with Spring Data JPA, deployed on Tomcat, and used PostgreSQL as the database. Implemented Hibernate for ORM and JDBC for database optimization. Utilized Kubernetes for container orchestration and Maven for build management. Applied design patterns such as Singleton and Repository in a monolithic architecture. Integrated Swagger for API documentation, ensuring seamless API testing and collaboration.

Skills | Strength & Expertise

Programming Languages:

Java, Python, JavaScript, SQL, PostgreSQL, MongoDB, HTML/CSS, Bash/Shell Scripting

Frameworks:

Spring/Spring Boot, Flask, Selenium, Beautiful Soup, Bootstrap, JUnit, Mockito

Technologies:

RESTful APIs, Maven/Gradle, Git, Docker, Kubernetes, Tomcat, Jetty, AWS, Kamatera, CI/CD (Continuous Integration/Continuous Deployment),Jira

Other Expertise:

Microservices Architecture, Design Patterns, Object-Oriented Programming (OOP), Functional

Programming, Data Structures & Algorithms, Linux, Unit Testing, Quality Assurance, Agile Methodologies, Networking (TCP/IP, OSI)

Soft Skills:

Problem-solving, Analytical Thinking, Communication, Teamwork, Time Management, Leadership, Adaptability

Certification | Award

Turing Academy – Java Backend Development Certificate (05/2024)

Udemy – Certified in Java Backend Development (12/2023)

Udemy – Certified in Full Stack Web Development (06/2023)

Education

Azerbaijan Technical University

Master's in Information Security of Telecommunication Systems

September 2023 - Present

Key subjects: TCP/IP Networking, OSI Layers, Linux Operating System

Azerbaijan State University of Oil and Industry

Bachelor's in Electronics, Telecommunications, and Radio Engineering

September 2019 - June 2023

Key project: Developed a traffic light model with Arduino programming

Turing Academy

Java Backend Development

January 2024 - August 2024

Key projects: Developed booking and banking applications, focusing on REST APIs with PostgreSQL, Spring/Spring Boot, Maven and Gradle, Data JPA, microservices patterns, design patterns, and Spring Security

Alas Academy

Java Backend Development

July 2023 - November 2023

Key projects: Developed a movie application and a family application, applying Java SE, object-oriented programming, algorithm and data structures, functional programming, and lambda expressions

Languages

Azerbaijani: Native

English: Intermediate

Turkish: Fluent
